SUMMARY

Senior Software Engineer with 7+ years of experience designing and building scalable backend systems and cloud-native infrastructure across banking, fintech, and enterprise platforms. Currently leading a backend engineering team at Bank Mandiri, delivering high-impact features for Livin Merchant grounded in Clean Architecture, CQRS, and SOLID principles. Strong track record mentoring engineers, driving CI/CD adoption, and partnering with security teams to meet regulatory compliance (Bank Indonesia, OJK). Self-directed pivot into GPU/AI engineering: hands-on with CUDA kernel programming, PyTorch, and GPU performance profiling, building and benchmarking custom GPU kernels (up to 956x speedup vs. CPU) toward AI infrastructure and GPU/deep-learning software engineering roles.

EXPERIENCE

Senior Software Engineer — PT Bank Mandiri Tbk Jan 2025 – Present
Grogol, West Jakarta

- Lead a 3-engineer backend team building and shipping features for Livin Merchant, a high-traffic enterprise merchant banking platform.
- Drive complex, high-impact initiatives end-to-end, turning business requirements into scalable, maintainable backend solutions for mission-critical systems.
- Mentor junior engineers to raise code quality, sharpen delivery consistency, and strengthen collaboration across teams.
- Act as the engineering counterpart to solution architects and security teams, keeping every release aligned with Bank Indonesia and OJK regulatory standards.
- Coordinate with external vendors on performance and penetration testing to harden the platform's scalability, reliability, and security before release.

Software Engineer — PT Avows Global Technology Jul 2023 – Dec 2024
Grogol, West Jakarta

- Embedded in a flagship enterprise engagement at PT Bank Mandiri Tbk, helping build the Livin Merchant platform from the ground up.
- Engineered enterprise-grade features in .NET 8 using Clean Architecture, CQRS, and SOLID principles — built to scale and stay maintainable as the platform grew.
- Championed a collaborative team culture through hands-on mentoring, lifting delivery consistency across the squad.
- Partnered with DevOps to stand up CI/CD pipelines and automated testing, cutting deployment errors and accelerating release cycles.

Fullstack Software Engineer — PT Platinumetrix Global Inovasi (PGI Data) Jan 2022 – Jun 2023
Kuningan, South Jakarta

- Architected and built the Integrated Core System for Lembaga Penjamin Simpanan (Indonesia's deposit insurance authority) using .NET Core, AngularJS, SQL Server, Kafka, and Redis.
- Delivered a full System and Cost Control application for Sudestada Restaurants from the ground up, using Python (FastAPI) and PostgreSQL.
- Built iCounting, a PGI Data platform, end-to-end using Go (Gin), Next.js, and PostgreSQL.

.NET Fullstack Developer — PT Astra Graphia Information Technology May 2019 – Dec 2021
Kelapa Gading, North Jakarta

- Built and maintained internal enterprise tools for PT Astra Otoparts Tbk using ASP.NET, VB.NET, and .NET Framework.
- Streamlined data integration and reporting workflows with SSIS and SSRS, improving accuracy and turnaround for business teams.

Intern Fullstack Developer — Ministry of Finance of the Republic of Indonesia Jun 2017 – Sep 2017
Jakarta

- Gained early hands-on fullstack development experience in a government technology environment during a pre-graduation internship.

SKILLS

Languages	Go, Python, Java, C#, TypeScript, JavaScript, Rust, SQL
Frameworks	.NET Core, ASP.NET, Spring Boot, NestJS, Next.js, AngularJS, Node.js, FastAPI, Gin, Axum
AI & Machine Learning	CUDA, PyTorch, TensorFlow, Hugging Face, OpenAI API, Ollama, scikit-learn, NumPy, Pandas
Databases	PostgreSQL, SQL Server, Oracle, MongoDB, Redis
Cloud & DevOps	Docker, Kubernetes, OpenShift (OCP), Azure, AWS, Jenkins, GitHub Actions, Kafka, ELK Stack, Control-M
Architecture	Clean Architecture, CQRS, SOLID, Event-Driven Architecture, Microservices, SDLC
Tools	Git, SonarQube, Jira, Bitbucket, VS Code, JetBrains
Spoken	Indonesian (native), English (professional working proficiency)

EDUCATION

Universitas Atma Jaya Yogyakarta — Bachelor of Information Technology 2013 – 2018
Thesis: Sentiment Classifier using Python and spaCy
